## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #6,079,167 to VOEGELE Jr. in view of US Patent #5,561,952 to DAMRON. VOEGELE, Jr. discloses a roof structure (10) including a plurality of rafters (14) spaced from a roof deck (12) thereby to provide an insulation (62) therebetween, column 5, line 61, and away from the interior ceiling (IS), see below, and a skylight (24) mounted

between two rafters (14), see figure 1. VOEGELE, Jr. discloses the basic claimed roof structure except for including a roof vent. DAMRON teaches that it is known in the art to provide the skylight (10) of roof structure with vents (17). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the roof of VOEGELE, Jr. with the roof skylight/vent of DAMRON in order to enhance the air

flow throughout the roof and the entire structure while also condensing the number of elements disposed on the roof. the combination skylight/venting device make available a unitary structure and decreases the amount of work required to give air to the structure.

### ***Response to Arguments***

Applicant's arguments filed 10/4/05 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, skylights and vents are old and very well known in the art; however, DAMRON is provided to teach that in fact skylights do have vents. Hence, it would be obvious to vent the skylight arrangement of VOEGELE, Jr. By providing the VOEGELE, Jr. arrangement with vents, the roofing system is being provided with a way of giving circulation of air therethrough. The skylight alone will let in the sun's rays and will eventually heat up the roof area. Thus, vents will aid in alleviating the heat in the roof area.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
